How to use the WAVE Route & Schedule Guide

To use the WAVE Route and Schedule Guide, just determine where you are located (origin) on the system map, then find where you want to go (destination). Look at the WAVE bus routes near where you are and near where you want to go and select one that serves both your origin and destination. To determine what time the bus will arrive at your point of origin along your route, find the color-coded schedule for that route. Look at the timepoints across the top of the schedule. To judge the time that the bus will come to a stop near you, check the times for the timepoints just before and after your stop. Follow the same procedure to figure out what time you will arrive at your destination. If you need further assistance in using the Route and Schedule Guide, call the WAVE information number.

How to ride the WAVE Transit buses

Once you know what bus to meet and where and when to meet it, you're ready. Wait by the bus stop sign along the route until you see your bus. You can identify your bus by reading the number and name of the bus route on the sign above the driver's windshield. Wave to the bus driver to indicate you want him to stop for you. As you board the bus, drop your exact fare or bus ticket into the farebox. Our bus drivers do not carry change, so please have your exact fare when boarding. If you need a transfer to complete your trip, ask the driver for one. Take a seat and enjoy your trip. When you are ready to get off the bus, pull the bell cord above the window about one block before your destination. When the bus stops, please exit by the rear door, if possible.
